BASE DE DATOS

```java
package com.example.recyclerview.BaseDatos;

import android.content.Context;
import android.database.sqlite.SQLiteDatabase;
import android.database.sqlite.SQLiteOpenHelper;

import androidx.annotation.Nullable;

public class AdminSQLiteOpenHelper extends SQLiteOpenHelper {
    public AdminSQLiteOpenHelper(@Nullable Context context, @Nullable String name, @Nullable SQLiteDatabase.CursorFactory factory, int version)
        super(context, name, factory, version);
    }

    @Override
    public void onCreate(SQLiteDatabase BD) {

        BD.execSQL("CREATE TABLE Mascota (id INTEGER PRIMARY KEY AUTOINCREMENT, foto int, nombre text, ranking int)");

    }

    @Override
    public void onUpgrade(SQLiteDatabase BD, int i, int i1) {

        BD.execSQL("DROP TABLE IF EXISTS Mascota");
        onCreate(BD);

    }
}
```
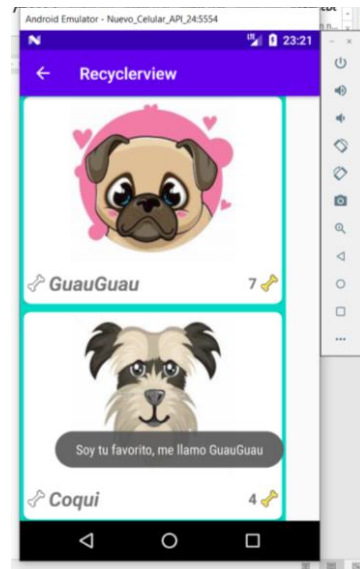

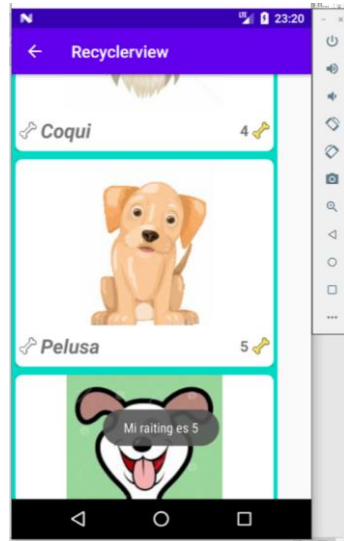

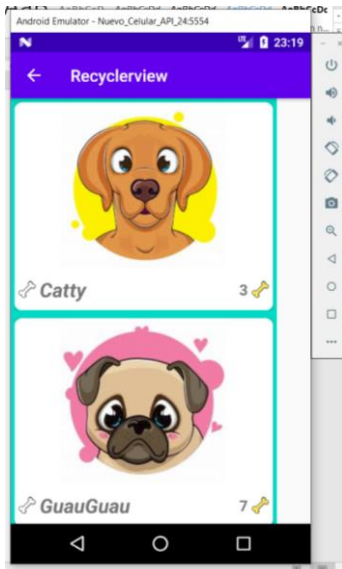

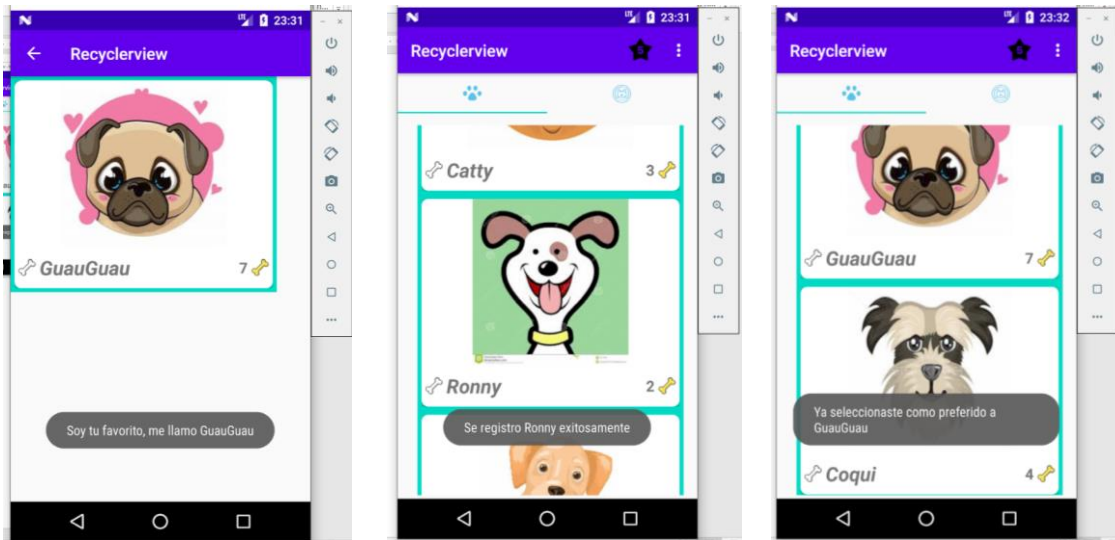

AdminSQLiteOpenHelper > onCreate()
